

Inspiration on political participation for a consultant (appraiser)

This collection of ideas is intended to give us something to think about when establishing measures within the corporate sustainability dimension *political participation*. This list is by no means exhaustive. However, we want to encourage you to reflect on your own ideas and measures and find inspiration and validation with regard to your sustainability in this context.

Using the collection of ideas, you can rate for yourself the extent to which the points mentioned are relevant to your commission and the extent to which you believe they support a **POSITIVE IMAGE**, have a **MAJOR IMPACT** or can be implemented with **LITTLE OUTLAY**. Your assessment is only saved locally, meaning that nobody but you can view it, and you can amend or delete it at any time.

POSITIVE IMAGE	MAJOR IMPACT	LITTLE OUTLAY
-------------------	-----------------	------------------

Social engagement

- Have you considered whether you can also give something back to society in an appropriate way (e. g. lectures at NGOs)?

- In most GIZ countries, our country offices and projects get involved in the annual *Sustainability Action Days*. Can you think of ways in which you could participate in them?

- Is there any potential for doing something extra for your local community within the wider scope of your commission (e. g. cooperating with NGOs on local educational or environmental projects or supporting civil society initiatives)?

Stakeholder management

- Do you speak with your stakeholders or offer them forums for dialogue so that they become more aware of their own impact?
